Request Information
Request Description
Users will have the ability to view their order history and reorder items easily from previous purchases, streamlining the ordering process for repeat customers.
Justification
Providing users with access to their order history enables them to easily reorder items, streamlining the process for repeat customers. This feature enhances user convenience and encourages loyalty by simplifying the ordering experience for frequent users.
Effect if declined (Risk if the project request is declined)
If this requirement is declined, users may find it cumbersome to reorder their favorite items, leading to frustration and potential loss of repeat business. The absence of an order history could decrease customer retention and overall satisfaction, as users may seek more efficient options elsewhere.
