Request Information
Request Description
A dashboard for restaurant staff to manage orders, menu, and more should be provided.
Justification
A dashboard for restaurant staff enables efficient order management and streamlined operations, improving service speed and accuracy. By providing access to menu updates and order tracking, staff can enhance the overall dining experience for customers.
Effect if declined (Risk if the project request is declined)
Without a dedicated dashboard, staff may struggle to manage orders effectively, leading to delays and errors. This can result in decreased customer satisfaction and operational inefficiencies, negatively impacting the restaurant's reputation and profitability.
